## Summary

Systems Engineer and Full Stack Developer with experience in the complete web application lifecycle using the **PHP (Laravel)** and **JavaScript (React, Vue.js, Svelte)** stacks. Focused on building dynamic interfaces and developing efficient business logic on **PostgreSQL** and **MySQL**. Committed to technical excellence through the use of best practices, design patterns, and a constant pursuit of professional growth.

## Education

**Bachelor - National University of Trujillo**, Systems Engineering LL, PERU  
Mar 2019 – Mar 2024

## Experience

**Simbiosys**, Analyst Developer Trujillo, LL  
Nov 2024 – Nov 2025  
1 year 1 month

- I implemented design patterns (Use Cases) in an ERP system with files exceeding 13,000 lines, achieving effective separation of logic and reducing technical maintenance by **25%**.
- I led the migration of critical modules from Smarty/PHP 5.4 to React and Svelte, improving interface loading speed by **40%**.
- I developed the integration of the **Culqi** payment gateway with support for ID and tax ID validation, ensuring cash flow for multiple B2B clients.
- I reduced the response time of accounting reports by optimizing complex functions and stored procedures in **PostgreSQL**.

**Pyrus HD S.A.C.**, Full Stack Developer Trujillo, LL  
Nov 2023 – Oct 2024  
1 year

- I transformed design mockups into functional applications using **Laravel/Vue.js**, managing everything from data persistence to deployment in production environments.
- I integrated **Google Maps APIs** and other services to automate customer service and data visualization, increasing the company's technological value.
- I redesigned redundant workflows on web platforms, reducing execution time for end users by **30%**.
- I developed electronic invoicing and accounting management modules for a university, addressing critical feedback from the Product Owner.
- I managed the implementation of Premium SSL certificates and reCAPTCHA protection across multiple sites, ensuring **99.9%** uptime.

## Skills

**Languages:** PHP, JavaScript, TypeScript, SQL, Java.

**Frameworks:** Laravel, React, Vue.js, Svelte, Astro, Spring Boot.

**DB & Tools:** PostgreSQL, MySQL, SQL Server, Docker, Git (GitFlow), Postman/Bruno, Linux (Ubuntu/Debian), Jira, Trello.

**Architecture and methodologies:** Microservices, Clean Code, SOLID Principles, SCRUM, RUP.

## Languages

**Spanish:** Native

**English:** Level A2 (Certified by CIDUNT)
